

### **DESCRIPTION**

It's important to keep your car's **radiator** and cooling system clean. Performing a **radiator flush** at least once a year stops corrosion from building up in your radiator. Your car's radiator and cooling system needs to be clean to be cool. As time goes on, your car's radiator builds solid deposits that can clog the cooling system. **Radiator Flush** is a quick and inexpensive way to keep your system in top shape. **Radiator Flush** will remove dirt, sludge and other contaminants from your system. Remember, it's important to change your antifreeze seasonally as well.

### **USAGE**

Recommended for commercial, institutional, and household use.

### **DIRECTIONS**

Make sure your automobile is on a level surface before you begin flushing the system.

Gather all the things you'll need: garden hose, coolant, a new radiator cap.

**Step 1:** Open the radiator cap on the top of the radiator.

**Step 2:** Unscrew the drain plug on the bottom of the radiator.

**Step 3:** Place a hose into the top of the radiator and turn it on so that water is flowing through the radiator. Continue doing this until the water coming out of the drain plug is running clear.

**Step 4:** Screw the drain plug back into the bottom of the radiator.

**Step 5:** Pour 1 gallon of Radiator Flush into your radiator and fill the remainder with water, then screw the radiator cap back on. Large radiators will require more product.

**Step 6:** Turn on your engine and allow it to reach normal operating temperature.

**Step 7:** Turn on your heater and place it on the hottest setting, then allow the engine to run for 10 minutes.

**Step 8:** Turn off the engine and wait until the engine has cooled.

**Step 9:** Open the radiator cap and then the drain plug at the bottom of the radiator. Allow all the liquid to drain out.

**Step 10:** Close the drain plug and refill the cooling system with a 50/50 water and coolant solution, then replace the radiator cap with a new one.

### **PRODUCT SPECIFICATIONS**

<b>APPEARANCE</b>	Clear liquid
<b>pH IN CONCENTRATE</b>	2.5
<b>FLASH POINT</b>	None, non-flammable
<b>WATER SOLUBILITY</b>	Emulsifies
<b>BIODEGRADABLE</b>	Yes
<b>SHELF LIFE</b>	1 Year in unopened container
<b>PACKAGING</b>	55, 35, 15 Gallon drums 5 Gallon pails Cases of 6/1 and 4/1 Gallon jugs

### **SAFETY INFORMATION**

**KEEP OUT OF REACH OF CHILDREN. DO NOT TAKE INTERNALLY.**

**CAUTION:** Danger! Corrosive. May be fatal if swallowed. May cause burns to skin and eyes. Harmful if inhaled.

#### **FIRST AID**

**SKIN:** Wash with plenty of soap and water for at least 15 minutes. If irritation develops, seek medical attention. **EYES:** Rinse with plenty of water for at least 15 minutes, raising eyelids occasionally. Seek medical attention immediately. **INGESTION:** Do not induce vomiting. Give water or milk to drink. Seek medical attention immediately. **INHALATION:** Remove the person to fresh air. Get medical attention at once.
